

# Pre-Measured Preservatives for Sampling

samplesmart

Are you in compliance with the Department of Transportation (DOT) shipping requirements? Do your sample containers arrive with leaking preservatives? Many laboratories are sending pre-preserved bottles to their clients, which when filled with sample, are unknowingly shipped to the laboratory not meeting DOT hazardous shipping requirements (40 CFR 136.3). With **o2si's samplesmart** pre-measured preservatives, the guesswork is eliminated. Each **o2si samplesmart** pre-measured preservative is formulated to meet DOT shipping requirements and EPA preservation protocol. The **o2si samplesmart** pre-measured preservatives come sealed and labeled with their contents, percent preservative, CAS number, and the appropriate size bottle to preserve. Each case of **o2si samplesmart** pre-measured preservatives comes with easy-to-follow preservation instructions. The **o2si samplesmart** pre-measured preservatives come in "to-deliver" Nalgene™ or Teflon™ containers.

- Meets DOT Non-Hazardous Shipping Requirements
- Meets EPA Preservation Protocol
- Easy "To-Deliver" Quantities
- Eliminates the Hazards of Pre-Preserved Bottles
