

Point-of-Use Inorganic Standards

standardsmart

o2si realizes that making standards is not the best use of an analyst's time. Analysts can spend up to one hour a day making standards and filling out the associated paperwork. With **standardsmart**, the need to mix standards is eliminated. **standardsmart** point-of-use standards allow the analyst to purchase standards at working concentrations. Standards are packaged in volumes for one day's use. Analysts simply open a new bottle each day and place it on the auto-sampler. This increases productivity, eliminates standard addition errors, reduces paperwork, reduces contamination problems, and reduces laboratory waste.

Provides Significant Cost Savings:

- Increases Productivity
- Eliminates Costly Standard Addition Errors
- Reduces Costly Re-preparations and Rework
- Reduces Paperwork
- Improves Quality
- Reduces Contamination Problems
- Reduces Costly Laboratory Waste
