

o2si EPA Method 5035 Sampling Products

smart solutions®

Collecting soil samples for volatile organic compounds can become very expensive and cumbersome. The **o2si sample smart®** and **prep smart®** EPA Method 5035 product line provides innovative and cost effective means of sample collection. Each product has been rigorously tested and proven to meet the most stringent sampling and analysis criteria.

All 5035 **o2si sample smart®** Low-Level vials are reanalyzed by EPA Method 5035 heated-purge specifications following preservation to ensure cleanliness. Each analyzed product is sent with a 5035 Certificate of Analysis.

Each EPA Method 5035 preserved vial is labeled with tare weight and unique vial ID number. All vials are tared with a calibrated balance checked against NIST traceable weights each day before use.

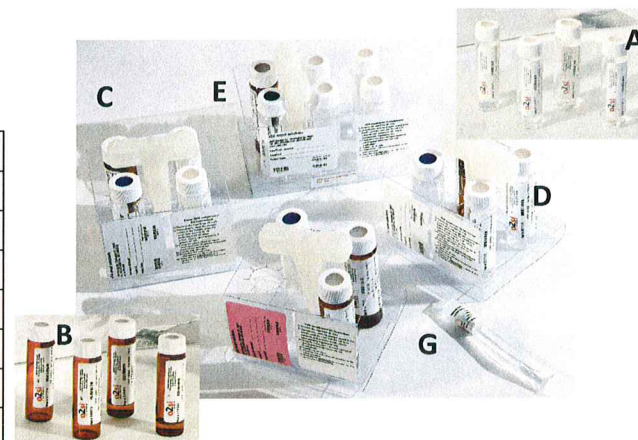

Catalog No.	Description
090001	sample smart® 5 g sampler
Low Level Vials	
190000-01	5 mL Bisulfate Vials, 72/cs
190002-02-01	5 mL Organic-Free H ₂ O Vials, 72/cs
190002-02-02	10mL Organic-Free H ₂ O Vials, 72/cs
High Level Vials	
190001-07	5 mL MeOH Vials, 72/cs
190001-01	10 mL MeOH Vials, 72/cs
smart delivery PFA Methanol Tubes	
190001-02	10 mL MeOH in PFA tube
190001-04	5 mL MeOH in PFA tube
sample smart® Kits	
190004-02	Premium Bisulfate Kit
190004-03	Premium H ₂ O Kit
190004-21	Econo VPH Kit
190004-22	Econo Bisulfate Kit
190004-24	Econo H ₂ O Kit
190004-27	Econo six-hole H ₂ O Kit

Note: Premium kits include an empty High-Level vial tared for methanol and accompanying Methanol smart delivery tube.

o2si is an ISO 9001 certified company

Introducing **o2si smart solutions' sample smart®** sampling device for EPA Method 5035. The **sample smart®** sampler is an ergonomically designed, easy to use sampling device designed specifically for EPA SW-846 Method 5035. This one time use sampler delivers approximately 5 grams of soil per aliquot. With the **sample smart®** sampler, the need for field weighing and additional sampling tools (i.e. expensive sampling handles) is eliminated. This all-in-one device makes soil sampling simple!

A. Low-level clear vials B. High level amber vials
 C. Econo H₂O Kit D. Econo 6-hole H₂O Kit
 E. Econo Bisulfate Kit F. Econo VPH Kit
 G. smart delivery MeOH PFA tube

All vials are available with or without solvents. Please contact customer service so we can meet your specific needs and to receive a sample.
